

1-2 Count and Dump

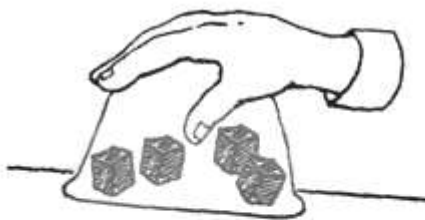

Small-Group Activity

Materials: Counters • Margarine tubs (1 per child)

This activity helps children focus on one-to-one correspondence as they count along with you. The children drop counters into their margarine tubs as they practice counting to a designated number. Then you or a student says "Dump," and everyone empties his or her tub and counts again. For example:

Dump.

One, two, three, four.

Repeat the activity several times.
