

ACTIVITY 2: TOTALITY

Instructions

- Player 1 chooses the overall total, for example 20, this is the total both players are trying to reach
- Player 2 places the counter on the game board – this number begins the count
- Player 1 moves the counter in any direction along a line segment to a neighbouring number and announces the total of the two numbers
- Players take it in turns to slide the counter to cover a neighbouring number and to add that number to the 'running' total
- Players must move when it is their turn and no 'jumping' is allowed
- The winner is the player who reaches the total or forces the other player to 'bust'
